EDUCATION

Silicon University — Bhubaneswar, Odisha
B.Tech in Computer Science Engineering (CGPA: 9.20) — *2023 – 2027*

SSVM, Neelakanth Nagar — Berhampur, Odisha
CHSE 12th Board (92%) — State Rank Holder — *2021 – 2023*

SSVM, Neelakanth Nagar — Berhampur, Odisha
CHSE 10th Board (93%) — *2021*

EXPERIENCE

Data Science, ML & Deep Learning Intern — Jun 2025 – Jul 2025
Syllogistek Systems Private Limited — *BBSR, Odisha*
- Built supervised ML workflows for preprocessing, training, and performance evaluation using Python and Jupyter Notebook.
- Implemented complete ML pipelines including EDA, visualization, feature handling, model training, and accuracy comparison.
- Applied ML concepts to real datasets using structured lab-based problem solving.

Python Programming & Applications Intern — Jun 2024 – Jul 2024
Syllogistek Systems Private Limited — *BBSR, Odisha*
- Completed an intensive Python program covering DS, functions, OOP, file handling, debugging, and modules.
- Built a RESTful Employee Management System using Flask, SQLAlchemy, CRUD operations, and testing.
- Worked with Git, Postman, and backend workflows through a structured mini-project.

PROJECTS

Resumyzer – AI-Backed ATS Resume Analyzer GitHub — *Nov 2025 – Dec 2025*
- Developed a full-stack AI web application to analyze resumes against ATS standards and job roles.
- Used generative AI to compute ATS scores, detect keyword gaps, and generate actionable resume feedback.
- Built a production-grade system using React frontend, FastAPI backend, and Supabase database.
- Focused on API reliability, real-world ML integration, deployment debugging, and failure handling.

EV Charging Chatbot Backend — Flask, Google Generative AI, Python GitHub — *Sept 2025 – Oct 2025*
- Built a lightweight backend powering an AI-driven EV assistant with real-time query handling.
- Implemented secure API handling, CORS support, and seamless integration with Gemini 2.5.
- Designed a clean, optimized architecture for mobile and web integration.

SMS Spam Classifier — Python, Scikit-learn, Streamlit, TF-IDF GitHub — *Jun 2025 – Jul 2025*
- Developed an end-to-end spam detection system with ML-based text classification.
- Applied TF-IDF vectorization and supervised learning models for message classification.
- Deployed the application with a user-friendly interface for real-time prediction.

TECHNICAL SKILLS

Languages: Python, SQL (MySQL)
Frameworks: FastAPI, Flask
Developer Tools: Git, HuggingFace, MCP, VS Code
Libraries: PyTorch, NumPy, pandas, OpenCV
Domains: Machine Learning, Deep Learning, NLP, Computer Vision, GenAI, Agentic AI, DSA

EXTRA-CURRICULAR ACTIVITIES

Event Management — *Jun 2024 – Present*
- Managed planning, coordination, and on-ground execution of major university events.

Student Mentorship — *Jun 2024 – Jun 2025*
- Mentored first-year students on academics, course decisions, and university adaptation.
