Education

Silicon University — Bhubaneswar, Odisha
*B.Tech in Computer Science Engineering (CGPA: **9.20**)* — *2023 – 2027*

SSVM, Neelakanth Nagar — Berhampur, Odisha
*12th (CHSE) — 92% (**State Rank Holder**)* — *2021 – 2023*
10th (CHSE) — 93% — *2021*

Experience

IIT-ROPAR Winter Research Intern — Jan 2026 – Mar 2026
National Programme on Technology Enhanced Learning (NPTEL) — Virtual — IIT Ropar
- Selected under **Prof. Sudarshan Iyengar**; built MERN stack foundations via guided implementation.
- Worked on full-stack case studies involving REST APIs, database integration, and frontend-backend communication.
- Implemented **Google Authentication (Sign-In)** in the PES project.

Syllogistek Systems Private Limited — BBSR, Odisha
Data Science, ML & Deep Learning Intern — *Jun 2025 – Jul 2025*
- Built end-to-end **ML pipelines** (EDA, preprocessing, feature engineering, evaluation) using **Python** & **Jupyter**.
- Analyzed **social media dataset** to predict **optimal posting time** for maximum engagement as final project

Python Programming & Applications Intern — *Jun 2024 – Jul 2024*
- Trained in Python (OOP, file handling, debugging) and worked with **Git, Postman**, and backend workflows.
- Built a **FastAPI-based RESTful Employee Management System** using SQLAlchemy with CRUD operations.

Projects

LAVEN: Autonomous AI Portfolio Agent — *Live* | *GitHub*
- Built an autonomous **AI portfolio agent** for conversational access to projects, skills, and experience.
- implemented **RAG pipeline** with semantic search, session context, and real-time web research using **Selenium**.
- Developed backend with **FastAPI + Supabase (PostgreSQL, JWT)** and React-based UI.

AgentIO: Blog Writing Agent — *Live* | *GitHub*
- Built a **blog-writing AI agent** using locally hosted LLMs via **Ollama**, eliminating dependency on paid APIs.
- Integrated **DuckDuckGo (DDG) search** for real retrieval with source links included in generated blogs.
- Reduced **hallucinations** via prompt tuning and temperature control; FastAPI backend with persistent local memory.

RESUMYZER: AI-Backed ATS Resume–JD Analyzer — *Live* | *GitHub*
- Built an **AI ATS analyzer** for resume–JD alignment using **Gemini** for parsing, skill matching, and evaluation.
- Developed full-stack application with **React (Vite)** and **Supabase** for data handling.
- Enabled automated report delivery using **EmailJS**.

Technical Skills

Languages: Python, SQL
Frameworks: FastAPI
Libraries: PyTorch, NumPy, pandas, LangChain, LlamaIndex
Tools: Git, HuggingFace, Ollama
Domains: Machine Learning, Deep Learning, NLP, GenAI

Extra-Curricular Activities & Achievements

Achievement: Secured **1st place** in Reverse Engineering (RISE 2026) organized by Achievers' Club, Silicon University.

Student Mentorship: Mentored freshers on academics, course selection, and university adaptation.

Engagements: Actively participated in expert talks on AI, gaining exposure to industry insights.

Event Management: Member of Campus Life Coordination Committee (CCC); contributed to planning, coordination, and execution of university events, along with managing hostel and campus operations.
