Education

Silicon University — Bhubaneswar, Odisha
B.Tech in Computer Science Engineering (CGPA: 9.20) — *2023 – 2027*

SSVM, Neelakanth Nagar — Berhampur, Odisha
CHSE 12th Board (92%) — State Rank Holder — *2021 – 2023*

SSVM, Neelakanth Nagar — Berhampur, Odisha
CHSE 10th Board (93%) — *2021*

Experience

NPTEL Winter Research Intern — Jan 2026 – Mar 2026
National Programme on Technology Enhanced Learning (NPTEL), IIT Madras — *Virtual — IIT Ropar*

- Selected for the national-level NPTEL Winter Internship 2025 under the mentorship of Prof. Sudarshan Iyengar, IIT Ropar.
- Engaged in guided research-oriented tasks emphasizing analytical thinking, structured problem solving, and technical reporting.
- Worked in a virtual academic research environment following IIT-standard evaluation and documentation practices.

Data Science, ML & Deep Learning Intern — Jun 2025 – Jul 2025
Syllogistek Systems Private Limited — *BBSR, Odisha*

- Built supervised ML workflows for preprocessing, training, and performance evaluation using Python and Jupyter Notebook.
- Implemented complete ML pipelines including EDA, visualization, feature handling, model training, and accuracy comparison.
- Applied ML concepts to real datasets using structured lab-based problem solving.

Python Programming & Applications Intern — Jun 2024 – Jul 2024
Syllogistek Systems Private Limited — *BBSR, Odisha*

- Completed an intensive Python program covering DS, functions, OOP, file handling, debugging, and modules.
- Built a RESTful Employee Management System using Flask, SQLAlchemy, CRUD operations, and testing.
- Worked with Git, Postman, and backend workflows through a structured mini-project.

Projects

Resumyzer – AI-Backed ATS Readiness & Resume–JD Analyzer GitHub — *Nov 2025 – Dec 2025*

- Developed a full-stack AI web application to evaluate resume alignment with ATS-style screening signals and job descriptions, improving candidate–role matching accuracy.
- Leveraged generative AI (Gemini 2.5-Flash) to evaluate parsing quality, skill–keyword relevance, and experience alignment, delivering actionable feedback to optimize candidate–role matching.
- Built and deployed a production-grade system using React (Vite), FastAPI, and Supabase with background email notifications sending via EmailJs.
- **Live_Link:** https://resumyzer24.vercel.app

EV Charging Chatbot Backend — Flask, Google Generative AI, Python GitHub — *Sept 2025 – Oct 2025*

- Built a backend service for an AI-powered EV charging assistant handling real-time user queries.
- Integrated Google Gemini for contextual responses with secure API handling and CORS support.
- Designed a lightweight, scalable architecture suitable for mobile and web clients.
- **Live_Link:** https://unicharge-chatbot-24.onrender.com/

SMS Spam Classifier — Python, Scikit-learn, Streamlit, TF-IDF GitHub — *Jun 2025 – Jul 2025*

- Developed an end-to-end machine learning system for SMS spam classification.
- Used TF-IDF vectorization with supervised learning models for text-based prediction.
- Deployed an interactive Streamlit application for real-time message classification.
- **Live_Link:** https://sms-spam-classifier-24.onrender.com/

Technical Skills

Languages: Python, SQL (MySQL)
Frameworks: FastAPI, Flask
Developer Tools: Git, HuggingFace, MCP, VS Code
Libraries: PyTorch, NumPy, pandas, OpenCV
Domains: Machine Learning, Deep Learning, NLP, Computer Vision, GenAI, Agentic AI, DSA

Extra-Curricular Activities

Event Management *Jun 2024 – Present*

- Managed planning, coordination, and on-ground execution of major university events.

Student Mentorship *Jun 2024 – Jun 2025*

- Mentored first-year students on academics, course decisions, and university adaptation.
