Education

Silicon University — Bhubaneswar, Odisha
*B.Tech in Computer Science Engineering (CGPA: **9.20**)* — *2023 – 2027*

SSVM, Neelakanth Nagar — Berhampur, Odisha
*12th Board (CHSE) — 92% (**State Rank Holder**)* — *2021 – 2023*

SSVM, Neelakanth Nagar — Berhampur, Odisha
10th Board (CHSE) — 93% — *2021*

Experience

IIT-ROPAR Winter Research Intern — Jan 2026 – Mar 2026
National Programme on Technology Enhanced Learning (NPTEL) — Virtual — IIT Ropar
- Selected for a national-level internship under **Prof. Sudarshan Iyengar**, gaining exposure to structured research.
- Built foundational understanding of the **MERN stack** through guided implementation and practical exercises.
- Worked on **full-stack case studies** covering REST APIs, DB integration, and frontend-backend communication.
- Strengthened concepts in **web architecture, problem solving, and real-world system design**.

Data Science, ML & Deep Learning Intern — Jun 2025 – Jul 2025
Syllogistek Systems Private Limited — BBSR, Odisha
- Built **ML workflows** for preprocessing, training, and evaluation using Python and Jupyter.
- Developed end-to-end **ML pipelines** including EDA, feature engineering, and model comparison.
- Applied **ML algorithms** on real datasets with structured analytical problem solving.

Python Programming & Applications Intern — Jun 2024 – Jul 2024
Syllogistek Systems Private Limited — BBSR, Odisha
- Completed intensive training in **Python**, covering OOP, file handling, debugging, and modules.
- Built a **Flask-based RESTful Employee Management System** using SQLAlchemy and CRUD operations.
- Worked with **Git, Postman**, and backend workflows in a structured development setup.

Projects

LAVEN: Autonomous AI Portfolio Agent — FastAPI, React, LangChain, Supabase, Selenium *GitHub*
- Built an autonomous **AI portfolio agent** enabling conversational access to projects, skills, and experience.
- Designed a **RAG pipeline** (LangChain + ChromaDB) with semantic search and session-based context isolation.
- Implemented **browser automation** (Selenium/Helium) for real-time web research beyond static knowledge.
- Developed backend with **FastAPI + Supabase** (PostgreSQL, JWT) with optimized memory handling.
- Built a **React frontend** with Framer Motion and TSParticles for smooth interactive experience.
- **Live:** portfolio-agent-inky.vercel.app

AgentIO Blog Writing Agent — Local LLMs, Ollama, Docker, FastAPI *GitHub*
- Built a **blog-writing AI agent** using **locally hosted LLMs**, removing dependency on paid APIs.
- Implemented **Ollama + Docker** for efficient local inference and model resource handling.
- Reduced **hallucinations** via prompt tuning, temperature control, and structured Markdown outputs.
- Integrated **Tavily search** for real-time retrieval beyond cutoff knowledge.
- Developed end-to-end pipeline with **FastAPI backend** and persistent local memory.
- **Live:** blog-writing-agent.vercel.app

Resumyzer – AI-Backed ATS Resume–JD Analyzer *GitHub*
- Built an **AI ATS analyzer** for resume–job description alignment and screening signals.
- Integrated **Gemini 2.5-Flash** for parsing, skill-keyword matching, and experience evaluation.
- Developed using **React (Vite), FastAPI, and Supabase**.
- Implemented **EmailJS** for automated report delivery.
- **Live:** resumyzer24.vercel.app

Technical Skills

Languages: Python, SQL (MySQL)
Frameworks: FastAPI, Flask
Developer Tools: Git, HuggingFace, MCP, VS Code
Libraries: PyTorch, NumPy, pandas, OpenCV
Domains: Machine Learning, Deep Learning, NLP, Computer Vision, GenAI, Agentic AI, DSA

Extra-Curricular Activities

Event Management *Jun 2024 – Present*

- Member of the **Campus Life Coordination Committee (CCC)**, involved in **planning, coordination, and on-ground execution** of major university events.

Student Mentorship *Jun 2024 – Jun 2025*

- Mentored **freshers** on **academics, course selection, and university adaptation** under the **Student Mentorship Program**.
